## News

### Share applicant groups with other users

Users are now able to share their applicant groups with other users or with the entire network.

Other users can subscribe to the shared applicant groups in order to use them in searches or graphical analyses.

The screenshot shows the 'Management' tab in the IP7tech interface. The 'Shared elements' button is highlighted with a blue box. Below the navigation bar, a 'Shared elements' window is open, showing a table of manual applicant groups. The table has columns for Name, Creator, and E-Mail. One group is listed: 'Apple' created by 'nothen' with email 'c.nothen@ip7.tech'. A checkbox next to the name is checked.

	Name	Creator	E-Mail
<input checked="" type="checkbox"/>	Apple	nothen	c.nothen@ip7.tech

### Optional evaluations

The administrator can set on the website (Administration) if an evaluation criteria must be assigned or not.

The users can leave optional evaluation criteria blank.

The evaluation can be finished without optional evaluation criteria.

The screenshot shows a document evaluation page for 'STEERING APPARATUS FOR RECUMBENT CYCLE'. The page displays a technical drawing of a steering apparatus and a list of evaluation criteria. The criteria are: 'because of xyz, this might be interesting', 'will be replaced in the future by xyz', and 'possibility of defeat'. Each criterion has a star rating and a text input field. A blue box highlights the 'possibility of defeat' criterion and its input field, which contains the text '- Optional - how difficult is it to bypass this invention?'.

## Update of IPC/CPC Classes

We included the latest update for IPC/CPC Classes in our database. The new classes are displayed and can be searched and evaluated.

CPC Version: 2019.02

IPC Version: 2019.01

In the next software update, we will highlight the old classes accordingly.

We will also check your saved searches and inform you in case you are using old classes in your searches.

## Full texts and tables

The evaluation of tables occurring in patent texts was improved. This way the display of tables in descriptions is now much better.

The image shows two side-by-side screenshots of a patent document's description page, illustrating an improvement in table rendering. Both screenshots show the same text: "[0097] Die folgenden Beispiele dienen dazu das Wesen der vorliegenden Erfindung zu erläutern, ohne daß aber beabsichtigt ist, die Erfindung auf diese Beispiele zu beschränken. Vielmehr kann der Fachmann eine Fülle von Variationen vornehmen, die seinem allgemeinen Fachwissen entspringen, die den Boden der vorliegenden Erfindung aber nicht verlassen. Die Mengenangaben der Rezepturen bzw. Beispiele bedeuten Gewichts-%, sofern nicht ausdrücklich anders gekennzeichnet."

**Left Screenshot (Before):** The table "Rezeptur I" is rendered with a broken layout. The header "Gew.-%" is in a separate row above the main table. The table content is as follows:

Rezeptur I	
Gew.-%	
Wirkstoff I (Nachtkerzenöl)	25,00
Wirkstoff II (Eucerit)	2,50
Wirkstoff III (Ceramid HO 3 von Rahn/Sederma)	3,00
Behenylalkohol	52,00
Cetylpalmitat	8,50
Ascorbylpalmitat	q.s.
SiO <sub>2</sub> hochdispers	7,50

**Right Screenshot (After):** The table "Rezeptur I" is rendered correctly. The header "Gew.-%" is now part of the table's header row. The table content is as follows:

Rezeptur I	
	Gew.-%
Wirkstoff I (Nachtkerzenöl)	25,00
Wirkstoff II (Eucerit)	2,50
Wirkstoff III (Ceramid HO 3 von Rahn/Sederma)	3,00
Behenylalkohol	52,00
Cetylpalmitat	8,50
Ascorbylpalmitat	q.s.
SiO <sub>2</sub> hochdispers	7,50

## Improvements

- The sorting in the evaluation history was improved. If multiple evaluation criteria are available, they are now sorted alphabetically.
- Automatic line break when assigning a comment for an evaluation.
- When searching for result lists the available result lists are sorted alphabetically.
- If multiple evaluation criteria must be filled in a monitoring task, the result list displays a scrollbar.
- When using bar graphs in the graphical analysis, the corresponding values are displayed for each bar individually.

## Bug fixes

- Under specific circumstances, the blue point in detail view – evaluation history – was not shown.
- In detail view, the project comment field was displayed when the user started with a monitoring task.
- When searching for evaluations, an error in the display was fixed. (Labelling of specific fields was not fully visible)
- After a Word/Excel/Highlighting/Standard-Filter – Export a faulty file name was displayed as a standard value.
- When changing the IP7 Compass settings the programme performed a restart without the approval of the user.
- When selecting „Countries per year” and the display “Stacked column chart” in the graphical analysis, no result was displayed.
- A possible crash in the analysis „Countries per year” was fixed.
