Project Folders

In addition to the “Personal Folder” and the “Network Folder” (available in the Network solution) the “Project Folder” was added as a new folder type for search projects.

A project folder is used to better organize patents within search projects. It is assigned to the research project and shows the folders created for the open research project.

If several users have access to a search project, you can also edit the associated project folder. This means you can create folders for this search project, assign patents etc.

If a search has been created, the relevant patents - divided into characteristics - can be assigned to such project folders. Now, the users of the specialist departments only have to be added to the search project. These users automatically have access to the project folder and can view the assigned patents or evaluate them if necessary.

By default, the project folders are not visible and are activated after consultation.

If you are interested, please contact us.

Evaluation – Display the most relevant evaluation

The display of evaluations within result lists or in detail view has been replaced by the display of the most relevant evaluation for the simple or extended family. For example, when an entry is displayed in a result list, the rating that is most relevant for the currently set basis (e.g. simple or extended patent family) is displayed.

If, for example, the result list is displayed on the basis of the simple patent family, the most relevant evaluation from the simple family is determined for each entry. The newest evaluations of all applications of the simple patent family are determined. From these newest evaluations, the highest evaluation is the "most relevant evaluation".

Example:

Up to now, the most recent evaluation of the family was displayed:

Modulare schwimmende Plattformen.

ANTHONY HILL DESIGNS LTD. HILL, ANTHONY EDWIN

Evaluation history x Biblio. info. Abstract / Claims Description Document links Additional Fields

View Project/Task view Filter None

bike and battery

EP 448877 B1	Christoph Nothen	03/06/2020 12:23:14
Basic ★★☆☆ evaluation 3		
EP 448877 A1	Christoph Nothen	03/06/2020 12:23:04
Basic ★★★★★ evaluation 2		
US 5129347 A	Christoph Nothen	03/06/2020 12:20:51
Basic ★★★★★ evaluation 1		

From now on, the highest evaluation within the family is displayed:

ANTHONY HILL DESIGNS LTD., LOUGHBOROUGH, GB
THONY EDWIN, LOUGHBOROUGH, LEICS, LE11 3PX, GB

Mod US 5129347 A - c.nothen@ip7.tech (03/06/2020) evaluation 1

bike and battery

EP 448877 B1	Christoph Nothen	03/06/2020 12:23:14
Basic ★☆☆☆☆ evaluation 3		
EP 448877 A1	Christoph Nothen	03/06/2020 12:23:04
Basic ★★★★★ evaluation 2		
US 5129347 A	Christoph Nothen	03/06/2020 12:20:51
Basic ★★★★★ evaluation 1		

The most up-to-date evaluation of the application is used, in our example the EP document does not use the A1 but the B1. However, the evaluation of the US document is higher than the newest evaluation of the EP script. Therefore, the US document evaluation is shown as the most relevant family evaluation.

CLI-Search (Command Line Interface)

The previously missing search blocks from the "normal search" are now also available in the CLI search. Now it is, for example, also possible to search for evaluations:

```

1 [S]
2 EVALUATION[ALL]:
3 (
4     SCHEME:("current importance":(3, 4)),
5     PROJECT:("Bike Disc Brakes"@nothen),
6     USER:("nothen", "rPaulson", "jDoeTest"),
7     DATE:[2020-04-01 TO 2020-06-03]
8 )

```

By default, the CLI search is not visible and is activated after consultation. If you are interested, please contact us.

Search for project status

Until now, it was only possible to search for the status (new, completed, not relevant) of the monitoring task; from now on, the status of projects can also be searched.

The screenshot displays the search interface. At the top, there is a row of search blocks represented by icons: Country, Applicant, Inventor, Kind of document, Classification, Bracket, Patent number, Result list, Additional Fields, Evaluation, Comment, Folder, Search, and Legal status. Below this is a 'Search blocks' section. A dropdown menu is open, showing 'Project/Task' and 'Advanced' options. The 'Project/Task' dropdown is further expanded to show 'Research project' and 'Monitoring Task'. To the right, there is a 'Whole databa' dropdown and a 'Search within' field. Below this is a search window titled 'Search X' with a search icon and 'Research project' in the title bar. The window contains a search input field with 'bike and battery', a 'Status' section with radio buttons for 'New', 'Not relevant', and 'Finished' (selected), and a 'Users' list showing 'nothen' and 'rPaulson'.

News in the web-application

Admin users can now create templates for country and language settings. These templates can then be used for selected users. If several new users are created by the admin user, the settings can then be created using a template. This means that not every user has to create their own settings.

Languages and countries templates management

Display records per page Search:

Template Name	Management
DE Settings	
ES Settings	
JP Settings	
US Settings	

Showing page 1 of 1 Previous **1** Next

Admin users can also export the list of monitoring tasks to Excel.

Management of Monitoring Tasks

Display records per page Search:

Bike Gear Shift	Granted	Strict family	Bike Gear Shift R&D	gear shift		0	0	

Showing page 1 of 1 Previous **1** Next

Another tab "Original / PDF" is available in the detailed view.

The screenshot displays a patent search interface. On the left, a technical drawing labeled 'FIG. 1' shows a bicycle disc brake rotor assembly with various components numbered (10, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 31, 32, 33, 34, 35, 36, 37, 38, 39, 40, 41, 42, 43, 44, 45, 46, 47, 48, 49, 50, 51, 52, 53, 54, 55, 56, 57, 58, 59, 60, 61, 62, 63, 64, 65, 66, 67, 68, 69, 70, 71, 72, 73, 74, 75, 76, 77, 78, 79, 80, 81, 82, 83, 84, 85, 86, 87, 88, 89, 90, 91, 92, 93, 94, 95, 96, 97, 98, 99, 100). On the right, the 'Original PDF' tab is active, showing the patent document for EP 1 847 452 B1. The document includes the following information:

- (19) Espacenet logo and text: "Espacenet - European Patent Office - Office européen des brevets"
- (11) EP 1 847 452 B1
- (12) EUROPEAN PATENT SPECIFICATION
- (45) Date of publication and mention of the grant of the patent: 06.01.2010 Bulletin 2010/01
- (51) Int Cl.: B62L 1/00 (2006.01) F16D 65/12 (2006.01) B60B 27/02 (2006.01)
- (21) Application number: 06255559.4
- (22) Date of filing: 27.10.2006
- (54) Disc brake rotor retaining assembly
Anordnung zur Befestigung eines Scheibenbremsen-Rotors
Dispositif de fixation d'un rotor d'un frein à disque
- (84) Designated Contracting States: DE NL
- (30) Priority: 17.04.2006 US 406476
- (43) Date of publication of application:
- (74) Representative: Brown, Deborah Frances Murgitroyd & Company

At the bottom of the interface, there are two star rating filters for 'current importance comment...' and 'future importance comment...', each with a 'Refresh' button. The footer indicates '© 2020 - IP7 Technologies' and 'v.20.5.0 - Powered by Bootstrap 4'.

The link to Espacenet has been updated and now opens the new Espacenet website. A refresh-button has been added for the filter in the result list. If, for example, additional evaluations have been assigned, the filter can be updated quickly.

The screenshot shows the IP7 Technologies dashboard. The 'current importance' filter is expanded, showing a table with the following data:

Filter	Count	Percentage
Entries without evaluation	8 / 52	15 %
current importance	44 / 52	84 %
★	17 / 52	32 %
★★	14 / 52	26 %
★★★	7 / 52	13 %
★★★★	6 / 52	11 %

Other filters listed include 'Project', 'Evaluation', 'Legal status', 'Countries', 'IPC', 'CPC', 'Applicant', and 'Inventor', each with an 'Order by: Count' dropdown menu. At the bottom, there is a 'Refresh' button and an 'Apply' button.

In addition, the web application has been completely revised with regard to mobile devices. Many small visual improvements were made.

Improvements

- As for monitoring tasks, the status for projects can be set to individual. If access is granted to other users after a search, these users can mark the results again with read / not relevant. In combination with project folders, the patents can be made available.

The screenshot displays a web application interface for managing search results. It features a search bar at the top left containing the text "bike and battery". Below the search bar is a "Description" field. To the right of the search bar are several filter sections:

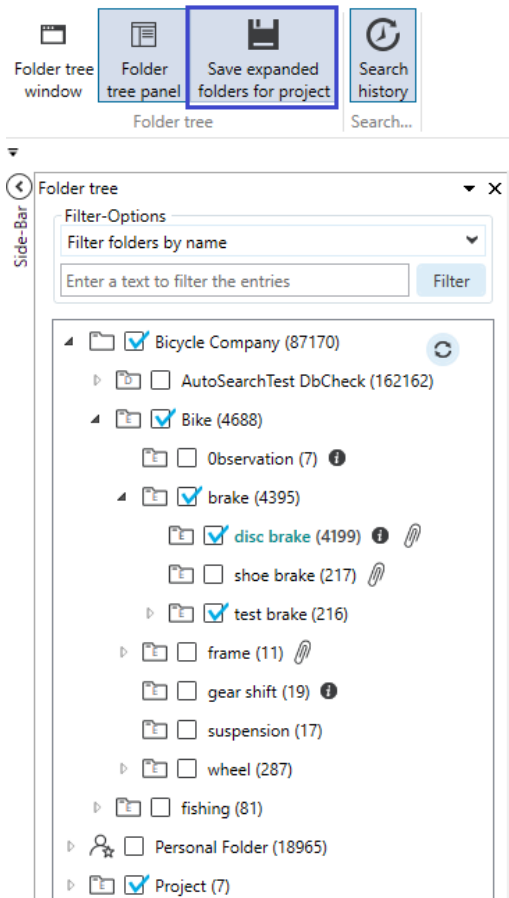

- Base:** Radio buttons for "Extended family", "Strict families" (selected), "Applications", and "Documents".
- Preferred document:** Radio buttons for "First publication" and "Granted" (selected).
- Highlighting scheme:** A dropdown menu set to "e-bike" with a trash icon.
- Status:** Radio buttons for "Individual" (selected) and "Apply for all users".

On the right side, there is a "Users" section with a search input field "Enter a text to filter the entries". Below this is a table of users:

<input type="checkbox"/>	Username	Email
<input type="checkbox"/>	ip7support	ip7-support@ip7.tech
<input type="checkbox"/>	jDoeTest	JohnDoe@ip7.tech
<input type="checkbox"/>	MMustermann	MaxMuster@ip7.tech
<input type="checkbox"/>	nothen	c.nothen@ip7.tech
<input checked="" type="checkbox"/>	rPaulson	c.nothen.2@ip7.tech
<input type="checkbox"/>	SystemSwoboda	m.swoboda@ip7.tech
<input type="checkbox"/>	TestGrautwaschl	TestAccount@ip7.tech

At the bottom right of the interface, there are two circular buttons: a checkmark and an 'X'.

- The opened folder structure can be saved for the current project. As soon as the project is opened again, the corresponding folder structure is opened.

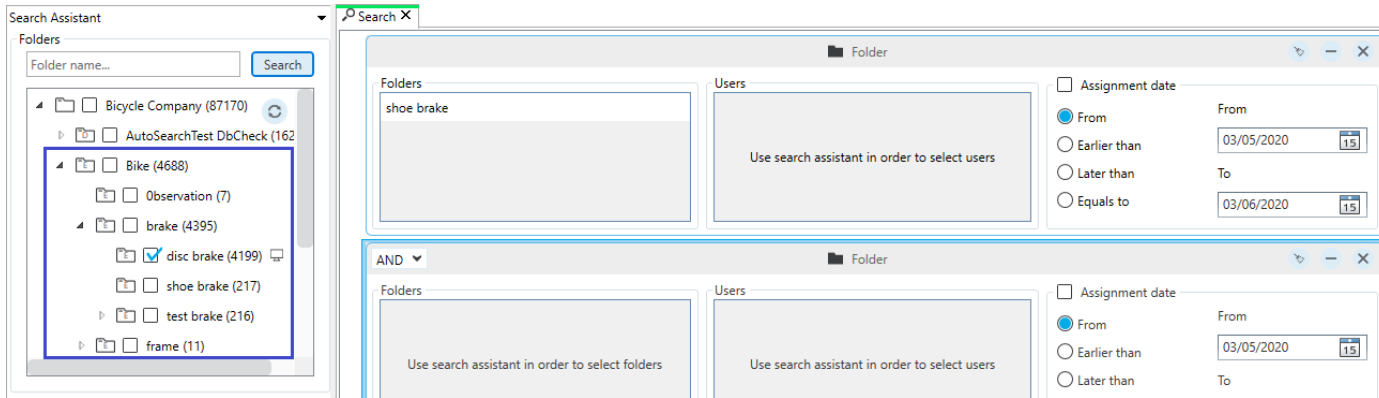

- The surface of the inventor search block has been improved.

- The surface of the applicant search block has been improved.

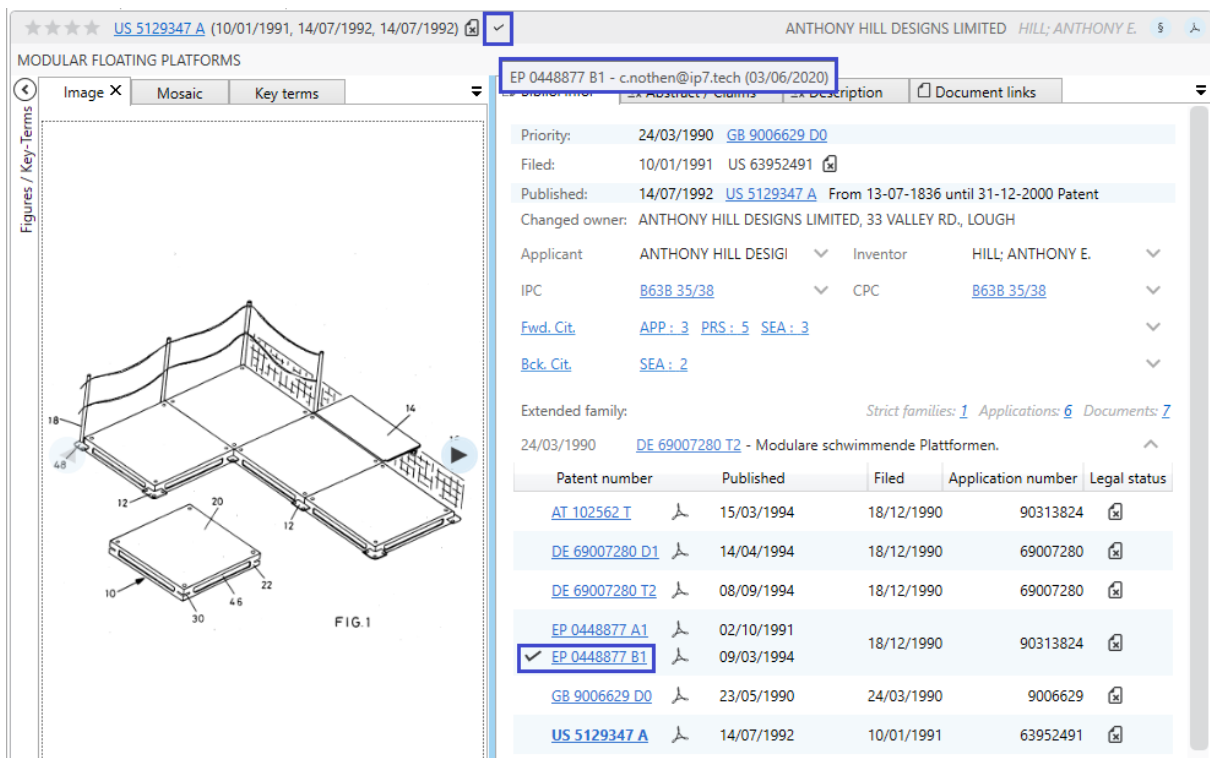

- The search assistant in the folder search saves the opened folder structure. If another folder search block is added, the opened folder structure is automatically displayed in the search assistant.

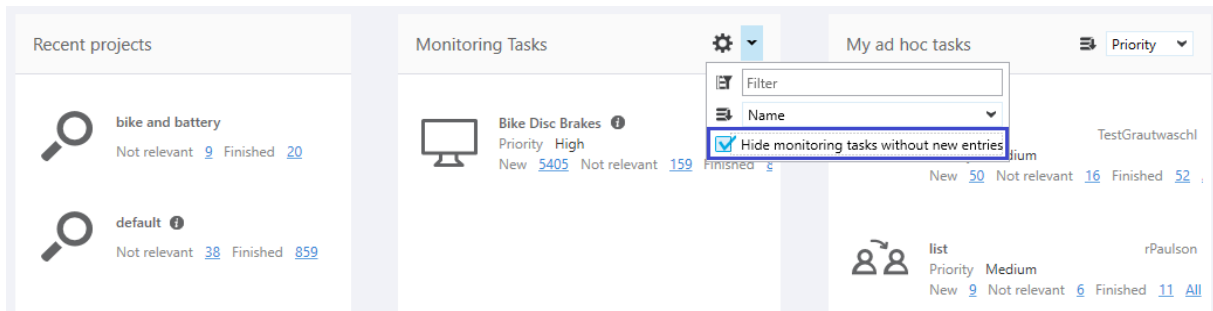

- The symbols and description for the simplified legal status have been improved. This applies to all cases that cannot be clearly classified.

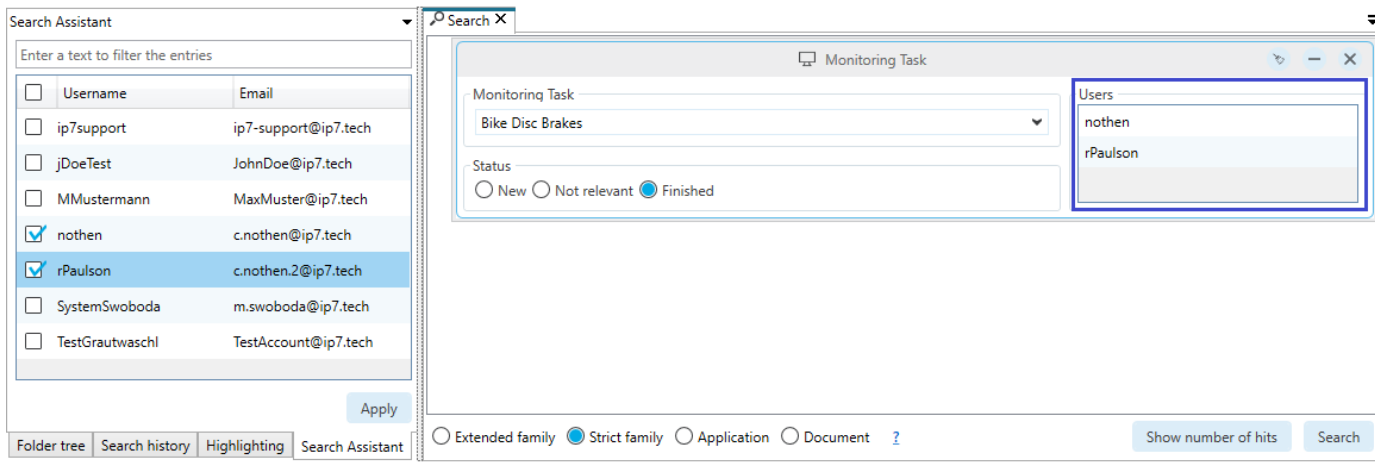

- In detail view, the read / irrelevant status is now also displayed in the header (across families).

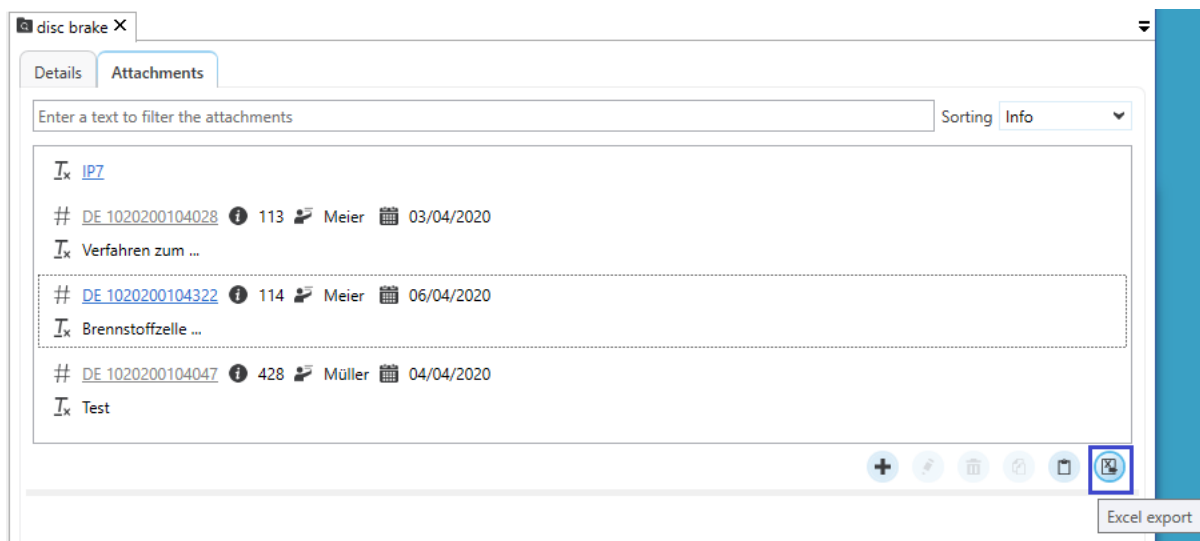

- Completed monitoring tasks can be hidden in the dashboard (monitoring task with 0 new patents).

- The search for Monitoring Task status has been expanded. You can now also search for users.

- Folder attachments can now be exported to Excel.

- Folder attachments can also be copied and pasted.

disc brake X

🗑️ 🔍

- The compact view in the result list is now also available without pictures. As soon as a patent is opened in the compact view, no images are displayed.

Bug fixes

- Key-Terms in the Term Hunter are not cut anymore.
- Graphical analysis – folder analysis – The folder selection in the assistant disappeared in specific cases.
