Search for Opposition filed

A new search option is available in the search mask.

Search and find patents, which contain information about an opposition in their legal status data.

Search for number of countries

You can now search for the number of countries within a strict or extended patent family. This way you can, for example, display only results with large families.

Outdated IPC/CPC Classes

IPC and CPC classes, which are presently outdated are highlighted in the search accordingly.

This way you can see at a glance if an outdated class is used in your search.

During next week we will check your saved searches and inform you in case you are using old classes in your searches. Within the "IpcCpcInfo" PDF file you can see all changes (new/old classes).

Improvements

- Additional fields with the type "Selection" can now be filtered.
