

Changes Version 23.8.0

Contents

Improvements	2
Bug fixes	2

Improvements

- The new CPC revision (CPC 2023.08) has been integrated.
- The link to the Chinese Patent Office has been updated on the legal status page and in the Observation. Unfortunately, a direct link to the respective patent is no longer possible.

Bug fixes

- For some EP patents the text formatting of the description texts (machine translations) was not recognized. The web application could not display/open these patents.

- Administration/management

- o Assignment: Users <-> Groups

- The filter for users or groups works again now.

- o The opened window for password reassignment locks all other elements.

- For example, it is no longer possible to open the window for password reassignment and deactivate the same user at the same time.
